

STABILIZER SOLUTIONS

Teacher Valerie Wilhite - Class Time 1 1/2 Hours

Stabilizer Solutions — The majority of the problems in machine embroidery stem from stabilizer issues. In this lecture class I will go over a wide variety of stabilizers, their uses and suggestions for various types of fabric or projects. You are encouraged to bring your samples (success and failures) and questions. A variety of samples will be on display to illustrate the way in which each stabilizer was used to achieve the desired result. You will take home handouts and sample sheets for future reference.

A minimum of two students is required for this class

Class Fee: \$20.00

Saturday, April 24, 2:30-4 p.m.
